

# TEXT WRAPPING

The screenshot shows the CorelDRAW X5 interface with a document titled "21 D TEXT WRAP.cdr". The main workspace contains the text "TEXT WRAPPING" and a paragraph: "To wrap paragraph text around an object". Below this, four numbered instructions are listed:

1. Select the object around which you want to wrap text.
2. Click Window Dockers Properties.
3. In the Object properties docker, click the General tab.
4. Choose a wrapping style from the Wrap paragraph list box.

Below the instructions, a red star is shown with text wrapped around it. The text is: "aighfalmlvleahqew rfrubgvrlubvkr; lunglv entun; lewllur ghw9; shghwgv rgw rhw; rhgqwrhfwq3 th tghre ugi; 74rh38qwhg zgerg wou".

The "Object Properties" docker on the right is open to the "General" tab, showing the "Wrap paragraph text" section. The "Wrap connector line" checkbox is checked. The "Text wrap offset" is set to 0.1 in.

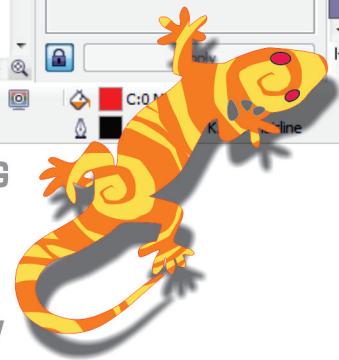

The "Window" menu is open, showing the "Dockers" option selected.
